FOR IMMEDIATE RELEASE

SOLON RECOGNIZED BY *SOLAR POWER WORLD* AS A TOP SOLAR CONTRACTOR FOR 2018

Tucson, AZ: SOLON Corporation (SOLON) was included in the annual rankings by *Solar Power World*. SOLON, which installed 6.2MW in 2017, was ranked as the number six solar provider in Arizona.

The Top Solar Contractors list is developed by *Solar Power World* to recognize the work of solar contractors across the United States. The list, produced annually, celebrates solar developers, subcontractors, and installers in the categories of utility, commercial, and residential markets. All rankings are based on kilowatts installed in the previous year.

“We are honored to be included in the year’s *Solar Power World’s* 2018 class of Top Solar Contractors,” said Brian Seibel, SOLON’s president. “The Arizona commercial solar market is expanding as more businesses and municipalities learn of the outstanding financial benefits. SOLON continues to meet these expanding needs with our team of local experts and in-house construction crews.”

The non-residential market grew 28% year-over-year in 2017, which was the fourth straight year of annual growth for commercial solar. In 2017, 30% of all new electric generating capacity brought online in the United States came from solar.

SOLON Corporation, headquartered in Tucson, AZ, is a leading provider of commercial and utility-scale photovoltaic system solutions to the Southwest United States. SOLON delivers complete and cost-effective turnkey PV systems to its clients with complete in-house project development, design, construction, financing, and O&M. SOLON has constructed over 110 MW of projects across the Southwestern United States.
