SOLON Corporation Featured on *Solar Power World* Top Contractors List

Recognized as #1 Commercial EPC Contractor in Arizona

Tucson, AZ: SOLON Corporation has been recognized by *Solar Power World* magazine as the number one commercial EPC solar contractor in Arizona for the second year in a row, and the company is among the top 26% nationally. SOLON's 2019 installations totaled 12.3 MW, a 66% year-over-year increase.

The Top Solar Contractors list is developed each year by *Solar Power World* to honor the work of solar installers big and small. Solar firms in the utility, commercial and residential markets are ranked by number of kilowatts installed in the previous year. "The *Solar Power World* team is so pleased to highlight more than 400 companies on the 2020 Top Solar Contractors list, especially during this unprecedented time," said Kelsey Misbrenner, senior editor of *Solar Power World*. "All contractors featured on the 2020 list reported strong 2019 installation numbers and are continuing to stand tall this year."

Solar Energy Industries Association (SEIA) data shows that Arizona now ranks 3rd in the U.S for installed solar, up from 4th in 2019, with 4,708 MW installed. This number is expected to grow by more than 2,300 MW over the next 5 years.

"The Arizona and Southwest U.S. commercial solar market continues to expand as more businesses, schools, and municipalities take advantage of the significant financial benefits of solar. SOLON is well positioned to meet these expanding needs with our team of solar experts and in-house construction crews," said Brian Seibel, SOLON's President. "SOLON's ranking in *Solar Power World's* 2020 class of Top Solar Contractors is a testament to our team's commitment to delivering solar projects on time, on budget, and as expected, with uncompromising safety and quality."

Headquartered in Arizona, SOLON Corporation is a full-service commercial and utility-scale solar contractor delivering turnkey solar power projects and battery storage solutions with a streamlined approach from project development, design, and construction to financing and ongoing operation. SOLON has constructed over 125 MW of solar across the Southwestern United States.
