SOLON Corporation Featured on *Solar Power World* Top Contractors List

Recognized as #1 Commercial EPC Solar Contractor in Arizona

Tucson, AZ: SOLON Corporation has been recognized by *Solar Power World* magazine as the number one commercial EPC solar contractor in Arizona. SOLON's 2018 installations totaled 7.4 MW, a 20% year-over-year increase.

The Top Solar Contractors list is developed by *Solar Power World* to recognize the work completed by solar contractors across the United States. Produced annually, the Top Solar Contractors list celebrates the achievements of U.S. solar developers, subcontractors and installers within the utility, commercial, and residential markets, and ranks contractors by kilowatts installed in the previous year.

The U.S. solar market is expected to see 14% growth in 2019, with over 12 GW of new solar power added to the grid this year – enough to power 2.28 million average American homes. In Arizona, installed solar totals 3,788 MW and that number is expected to grow by 2,769 MW over the next 5 years.

“The Arizona commercial solar market continues to expand as more businesses, schools, and municipalities take advantage of the significant financial benefits of solar. SOLON continues to meet these expanding needs with our team of solar experts and in-house construction crews,” said Brian Seibel, SOLON's President. “SOLON's ranking in *Solar Power World's* 2019 class of Top Solar Contractors is a testament to our team's commitment to delivering solar projects on time, on budget, and as expected, with uncompromising safety and quality.”

Headquartered in Arizona, SOLON Corporation is a full-service commercial and utility-scale solar contractor delivering complete and cost-effective turnkey solar power projects and battery storage solutions with a streamlined approach from project development, design, and construction to financing and ongoing operation. SOLON has constructed over 117 MW of solar across the Southwestern United States.
