## **SOLON Corporation Recognized on *Solar Power World* Top Contractors List**

*Ranked as #1 Commercial EPC Solar Contractor in Arizona*

**Tucson, AZ, July 20, 2021:** SOLON Corporation has been recognized by *Solar Power World* magazine as the number one Commercial EPC Solar Contractor in Arizona for the third year in a row, with a total of 7.364 MW installed in 2020.

The Top Solar Contractors list is developed each year by *Solar Power World* to honor the work of solar installers in the United States. Solar firms in the utility, commercial and residential markets are ranked by number of kilowatts installed in the previous year. Companies are grouped and listed by specific service, markets, and states.

The U.S. solar industry grew 43% in 2020, installing more solar panels on homes, businesses and across the country than any other year on record. The federal government passed a two-year extension on the solar investment tax credit (ITC) at the end of 2020, which will further accelerate solar adoption across all market segments.

“The Arizona and Southwest U.S. commercial solar market continues to expand as more businesses, schools, and municipalities take advantage of the significant financial benefits of solar. SOLON is well positioned to meet these expanding needs with our team of solar experts and in-house construction crews,” said Brian Seibel, SOLON’s President. “SOLON’s ranking in *Solar Power World*’s 2021 class of Top Solar Contractors is a testament to our team’s commitment to delivering solar projects on time, on budget, and as expected, with uncompromising safety and quality.”

Headquartered in Arizona, SOLON Corporation is a full-service commercial and utility-scale solar contractor delivering turnkey solar power projects and battery storage solutions with a streamlined approach from project development, design, and construction to financing and ongoing operation. SOLON has constructed 132.9 MW of solar across the Southwestern United States. [solonamerica.com](http://solonamerica.com)

### **About Solar Power World**

*Solar Power World is the leading online and print resource for news and information regarding solar installation, development and technology.
