

SOLON Corporation Recognized on *Solar Power World* Top Contractors List

Ranked as #1 Commercial EPC Solar Contractor in Arizona

Tucson, AZ, July 25, 2023: SOLON Corporation has been recognized by *Solar Power World* magazine as the number one Commercial EPC Solar Contractor in Arizona, with a total of 5,266 kWdc installed in Arizona in 2022. SOLON installed an additional 6,995 kWdc in Colorado.

The Top Solar Contractors List is developed each year by industry magazine *Solar Power World* to honor the work of solar installers in the United States. Solar firms in the utility, commercial, and residential markets are ranked by the number of kilowatts they installed in the previous year. Companies are grouped and listed by specific services, markets, and states.

“Renewable energy accounts for a quarter of U.S. electrical generation, now far exceeding electricity produced by burning coal,” said Kelsey Misbrenner, managing editor of *Solar Power World*. *“Solar power is an important member of that renewable makeup, and companies on the Top Solar Contractors List are all contributing to our country’s shift to cleaner electricity. We are honored to recognize them each year for their necessary work putting green kilowatts on roofs, over parking lots, in desert locations, and across water reservoirs. Every project is making a difference.”*

“The Arizona and Southwest U.S. commercial solar market continues to expand as more businesses, schools, and municipalities take advantage of the significant financial benefits of solar. SOLON is well positioned to meet these expanding needs with our team of solar experts and in-house construction crews,” said Brian Seibel, SOLON’s President. *“SOLON’s ranking in Solar Power World’s 2023 class of Top Solar Contractors is a testament to our team’s commitment to delivering solar projects on time, on budget, and as expected, with uncompromising safety and quality.”*

Headquartered in Arizona, SOLON Corporation is a full-service commercial and utility-scale solar contractor delivering turnkey solar power projects and battery storage solutions with a streamlined approach from project development, design, and construction to financing and ongoing operation. SOLON has constructed 157.8 MW of solar across the Southwestern United States. solonamerica.com

About Solar Power World

Solar Power World is the leading online and print resource for news and information regarding solar installation, development and technology. Since 2011, SPW has helped U.S. solar contractors — including installers, developers and EPCs in all markets — grow their businesses and do their jobs better.
